

PNP+BV forward solver demo — $\text{Cs}^+/\text{SO}_4^{2-}$, slide-15 V band, near no-Stern ($C_S = 100 \text{ F/m}^2$)
 no water hydrolysis, no cation hydrolysis; physical a_{nondim} for dynamic species; $L_{\text{eff}} = 100 \mu\text{m}$

Total disk current density vs V_{RHE}

Gross H_2O_2 current (R2e channel) vs V_{RHE}
